

ENERGY POLICY

We at **Riverina Oils Pty Ltd** are committed to pursuing production at the lowest energy intensity which is economically viable whilst reducing our greenhouse gas emissions (GHG). As part of our commitment to achieve principles of responsible **Energy Management and Sustainability**, we recognise our moral & legal responsibility to ensure that our activities, products and services are designed to protect & enhance the environment for current and future generations. Riverina Oils aims to fulfill its commitment by striving to:

- Comply with all laws, regulations, and reporting requirements applicable to energy and GHG emissions
- Seek cost efficient and sustainable use of energy resources to reduce energy use and greenhouse gas emissions per tonne of material processed
- Incorporate efficient energy production, energy use and GHG emission considerations, including energy and carbon prices, in all planning and investment decisions
- Identify and use leading energy practices and technologies to reduce and reuse energy
- Engage all levels of the operation to promote awareness and behaviours that support energy efficiency, responsibility, and reduced energy consumption
- Seek to continuously improve the operation's management of energy and GHG emissions
- Identify, implement, and report on appropriate targets to regularly monitor performance in energy production, consumption, intensity of use, cost and GHG emissions, on an annual basis
- Provide the necessary human, financial and capital resources to meet the objectives of this policy
- Pro-actively assess options to increase our use of renewable power and low emission energy technologies to reduce our GHG emissions intensity
- Implement and maintain an energy management system.

Responsibility for complying with Riverina Oils Energy Policy lies with the Directors, All line Managers and their subordinates / staff.
